#### Machine Manufacturing and Control System

Design of Sliding Mode Controller for the 2D Motion of an Overhead Crane with Varying Cable Length .....181

*Le Anh Tuan*

Unmanned Air Vehicle System's Data Links.....189

*İsmet Çuhadar and Mahir Dursun*

Control Valve Fault Detection by Acoustic Emission: Data Collection Method .....194

*Juwita Mad Juhani, Rosdiazli Ibrahim, and Intan Najiha Mohd Shukri*

A Comparative Analysis of Algorithms for Controlling the Attitude of an Unmanned Aerial Vehicle .....199

*Hafiz Farhaj Khan, Mansoor Saleem, Danish Mushtaq, and Faran Awais Butt*

A Sliding-Mode Controller with Zero Forced Zero PWM for Full Bridge Inverter .....204

*Shunshi Zhong, Xiucheng Dong, and Xiaomei Yu*

Application of Pressure Control Type Quasi-Servo Valve to Force Control System.....209

*Y. Moriwake, S. Dohta, T. Akagi, and S. Shimooka*

#### Robot Design and Development

An Efficient Adaptive Fuzzy Control Scheme for Industrial Manipulators .....213

*Abdel Badie Sharkawy, Douglas A. Plaza, and Daniel E. Ochoa*

Palm Tree Climbing Robot.....220

*Khaled R. Asfar*

The Implementation of Controlled Humanoid Robot with Android .....225

*Ahmet Aksoz, Salim Engin, and Mahir Dursun*

The Design of Humanoid Robot Using C# Interface on Bluetooth Communication .....229

*Salim Engin, Ahmet Aksoz, Mahir Dursun, and Melik Hiseyin Hamidiogullari*

#### Power System Control Technology

A Review of Multilevel Inverter Topology and Control Techniques.....233

*Gaddafi Sani Shehu, Abdullahi Bala Kunya, Ibrahim Haruna Shanono, and Tankut Yalcinoz*

Fault Detection and Protection of Induction Motor by Real Time Monitoring and Controlling of the Motor Parameters .....242

*Mehmet Fatih Işık, Mustafa Reşit Haboğlu, Hilmi Yanmaz, and Cemal Yılmaz*

Computer-based Decision Making Systems for Improved Energy Access in Sub-Saharan Africa .....247

*Taha Selim Ustun*

Frequency Regulation in an AC Microgrid with Diverse Sources of Power Using Intelligent Control Technique. ....252

*Vishal Saini and Sathans*

**Industrial Control Theory and Application**

A Set of Identification and Control Design Methods for an Industrial Air Heating Process with Time-Delay:  
Stability Analysis and Design Specifications .....257  
*Necdet Sinan Özbek and İlyas Eker*
